### ***Election/Restrictions***

Applicant's election without traverse of species A, Figs. 4 and 5 are in the reply filed on 7/16/2008 is acknowledged. However, claims 18-21 do not read on the elected species because the elected species shown in Figs 4 and 5 do not include the "stabilizing fins" included in claim 18. Accordingly only claims 1-10 and 16 read on the elected species and claims 11-15 and 18-21 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b).

### ***Specification***

The disclosure is objected to because specification appears to be a translation from a foreign language and includes informalities inherent therewith such as lacking the appropriate headings and lacking detailed description of the subject matter of claims 3-9.

Appropriate correction is required.

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the subject matter of claims 4-9 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended

replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

Claims 1-10 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. The claims were examined as best understood.

***Claim Rejections - 35 USC § 102 and 103***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9, as best understood, are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Regensburger (US 5,232,322). Regensburger discloses a fastening pin comprising elastic protrusions (4) located around a core (11). The protrusions are disclosed as having an acute angle and to come in a variety of shapes and dimensions (Figs. 4-13) which can be used together (see Abstract) to make for different heights and shapes along the shaft of the fastener. It is further disclosed that the protrusions and core can be made of different materials (see Abstract).

Claims 10 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Ide (US 6,371,710). Ide discloses a fastening pin (10) including a point (44) in the form of an elastic material (see Fig. 2). The masking strip is only included in the claims as an intended use.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
